

Funny Pumpkin Face Stencils

6 easy designs to trace and carve

How to use these stencils

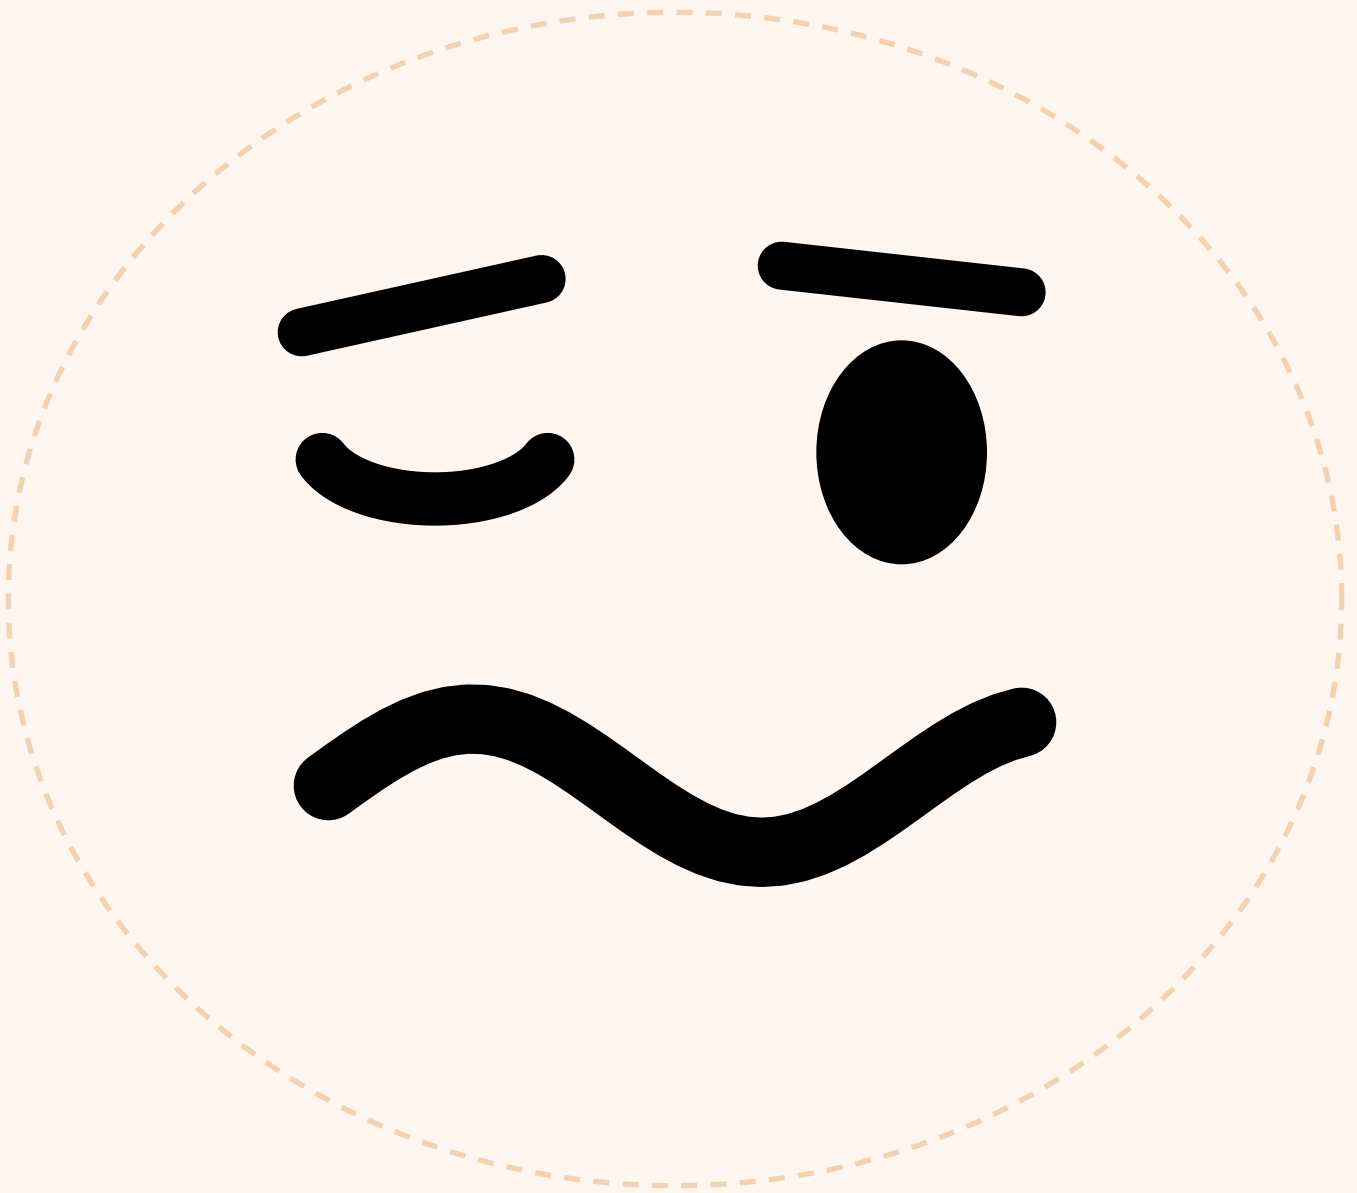

1. Print the stencil you want at full size on regular paper.
2. Trim around the dashed pumpkin outline.
3. Tape the stencil to a clean, dry pumpkin, smoothing it to fit the curve.
4. Poke along the edges of each black shape with a pushpin, about every 1/4 inch.
5. Remove the paper, connect the dots with a washable marker, and carve.
6. Black shapes are the areas you cut out. Thin lines can be carved or etched.

Designs included

- Woozy Face
- Buck-Toothed Grin
- Sneezy Face
- Heart Eyes
- Say Cheese
- Sly Wink

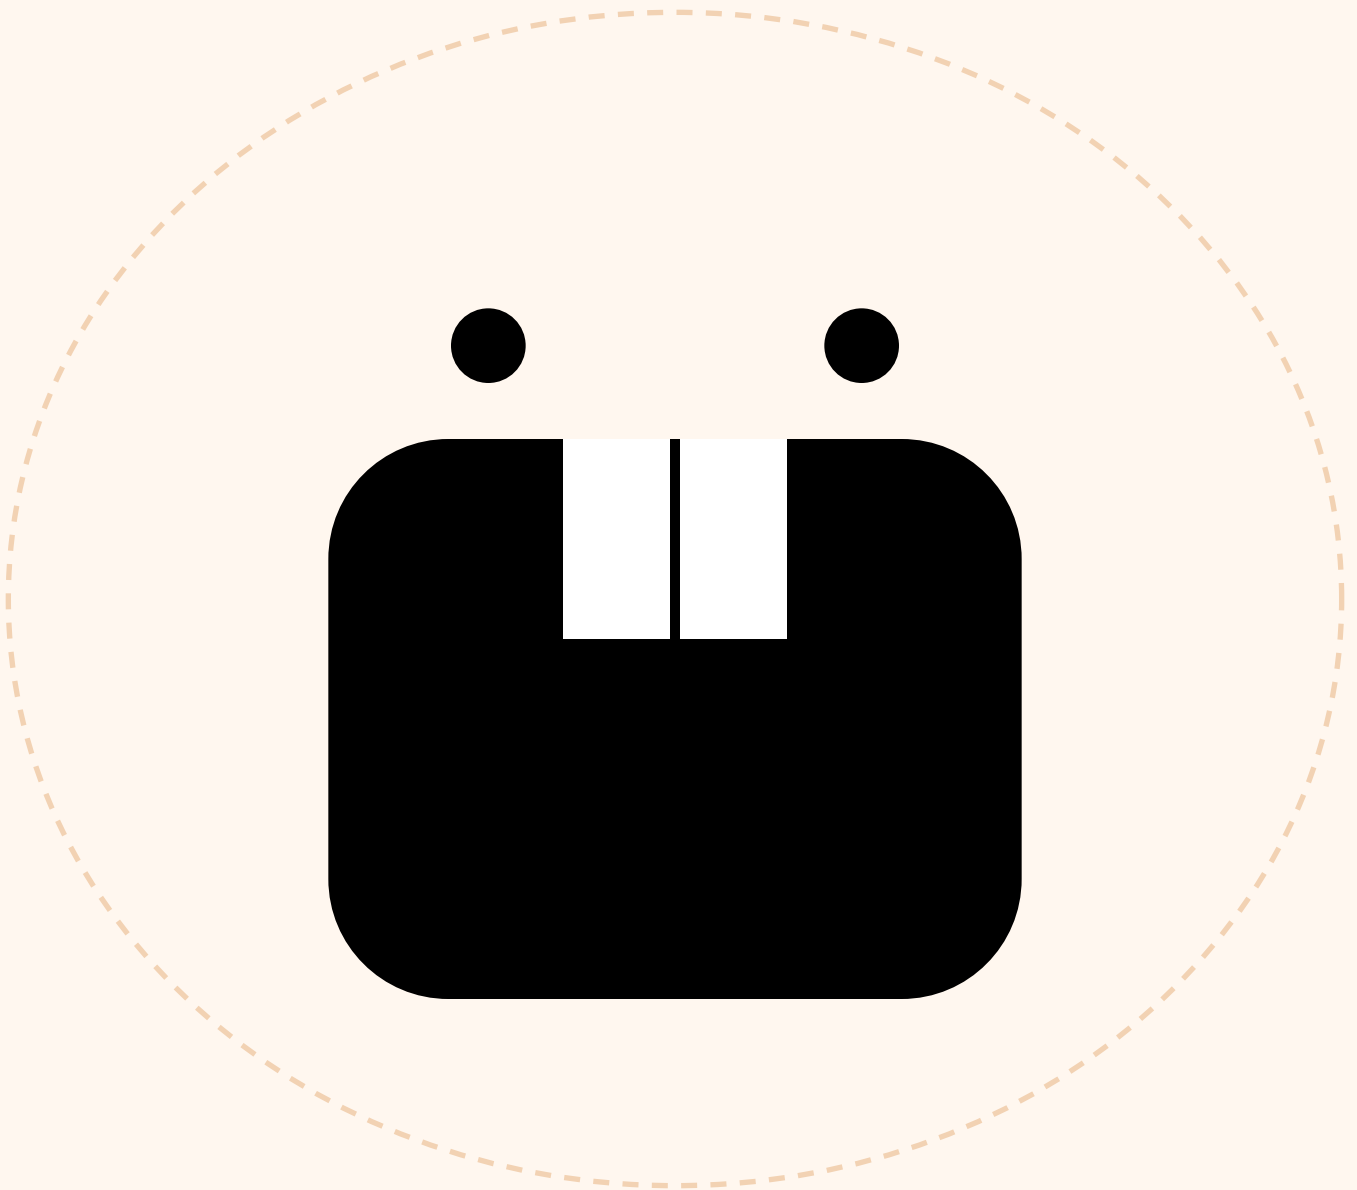

Safety tip: Adults should handle the cutting. Kids can trace, scoop and decorate!

Woozy Face

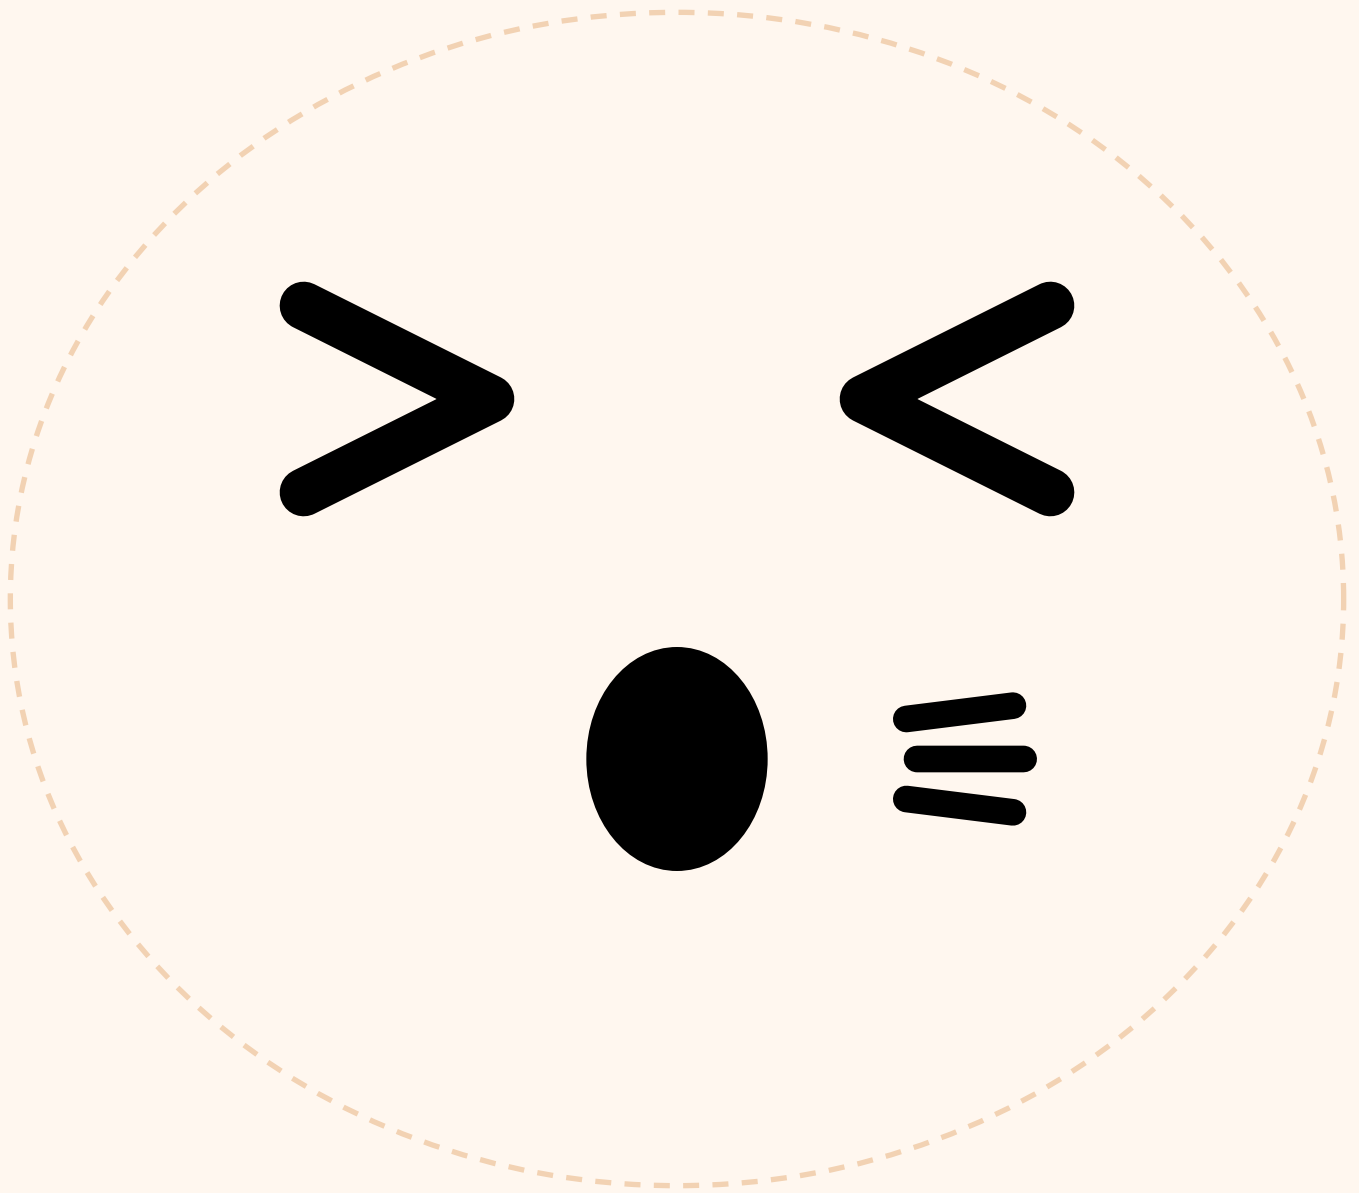

One squinty eye and a wobbly grin. Carve the wavy mouth with a small saw.

Buck-Toothed Grin

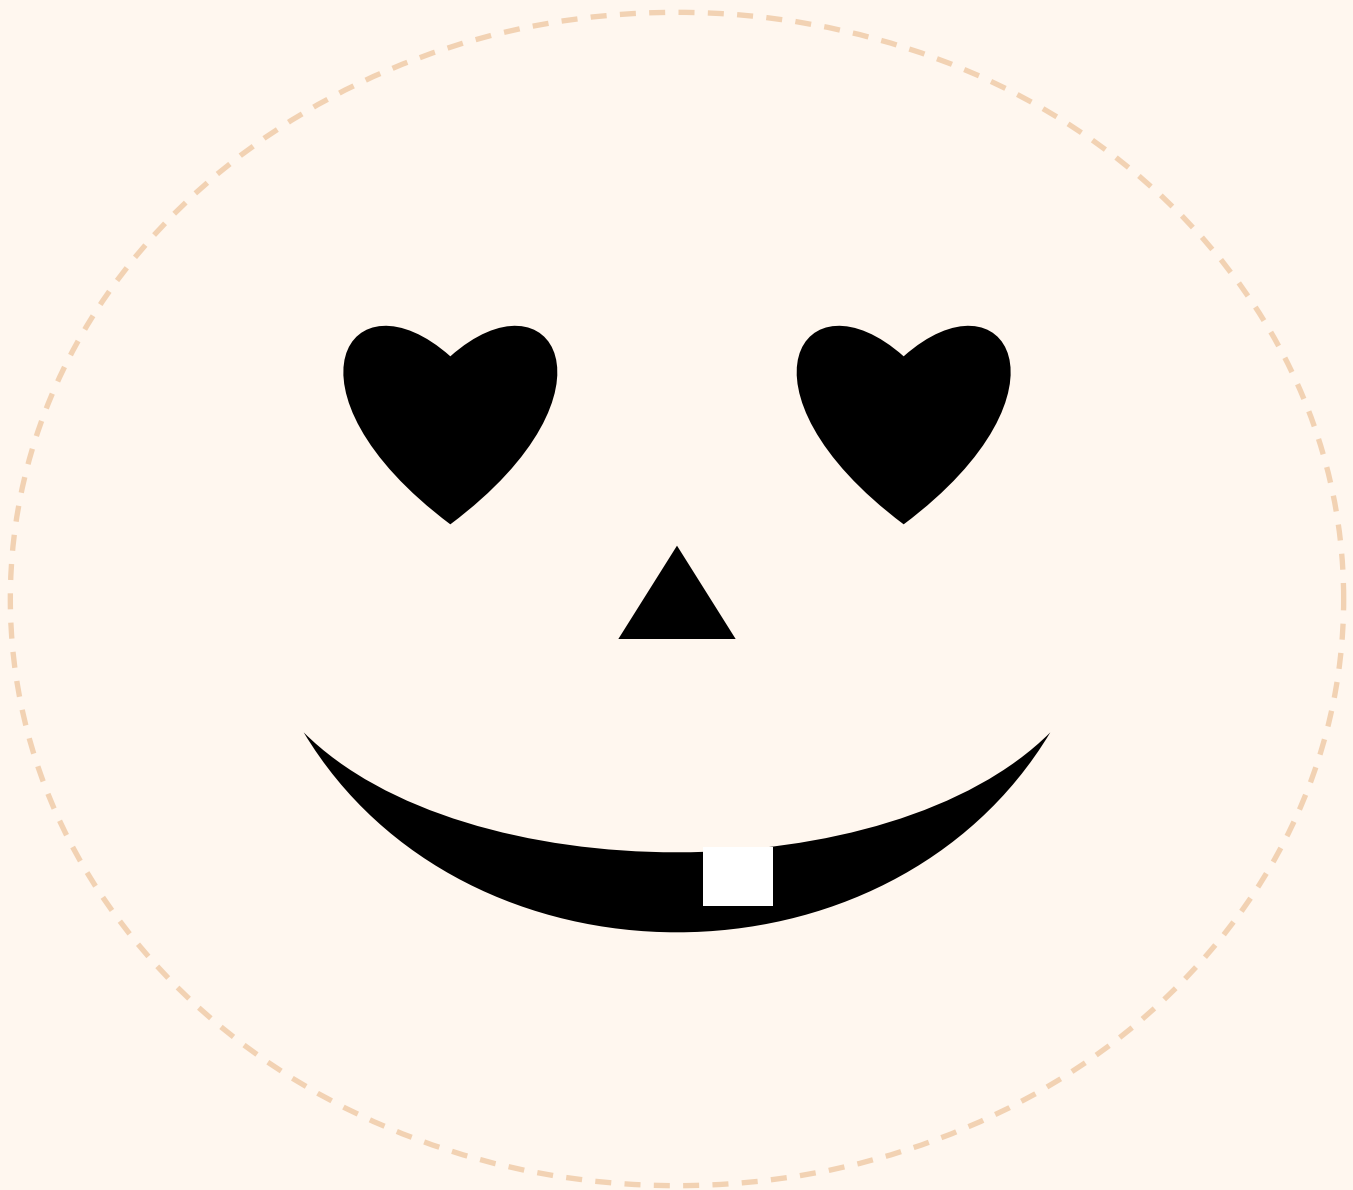

Leave the two white teeth attached when you cut out the mouth.

Sneezy Face

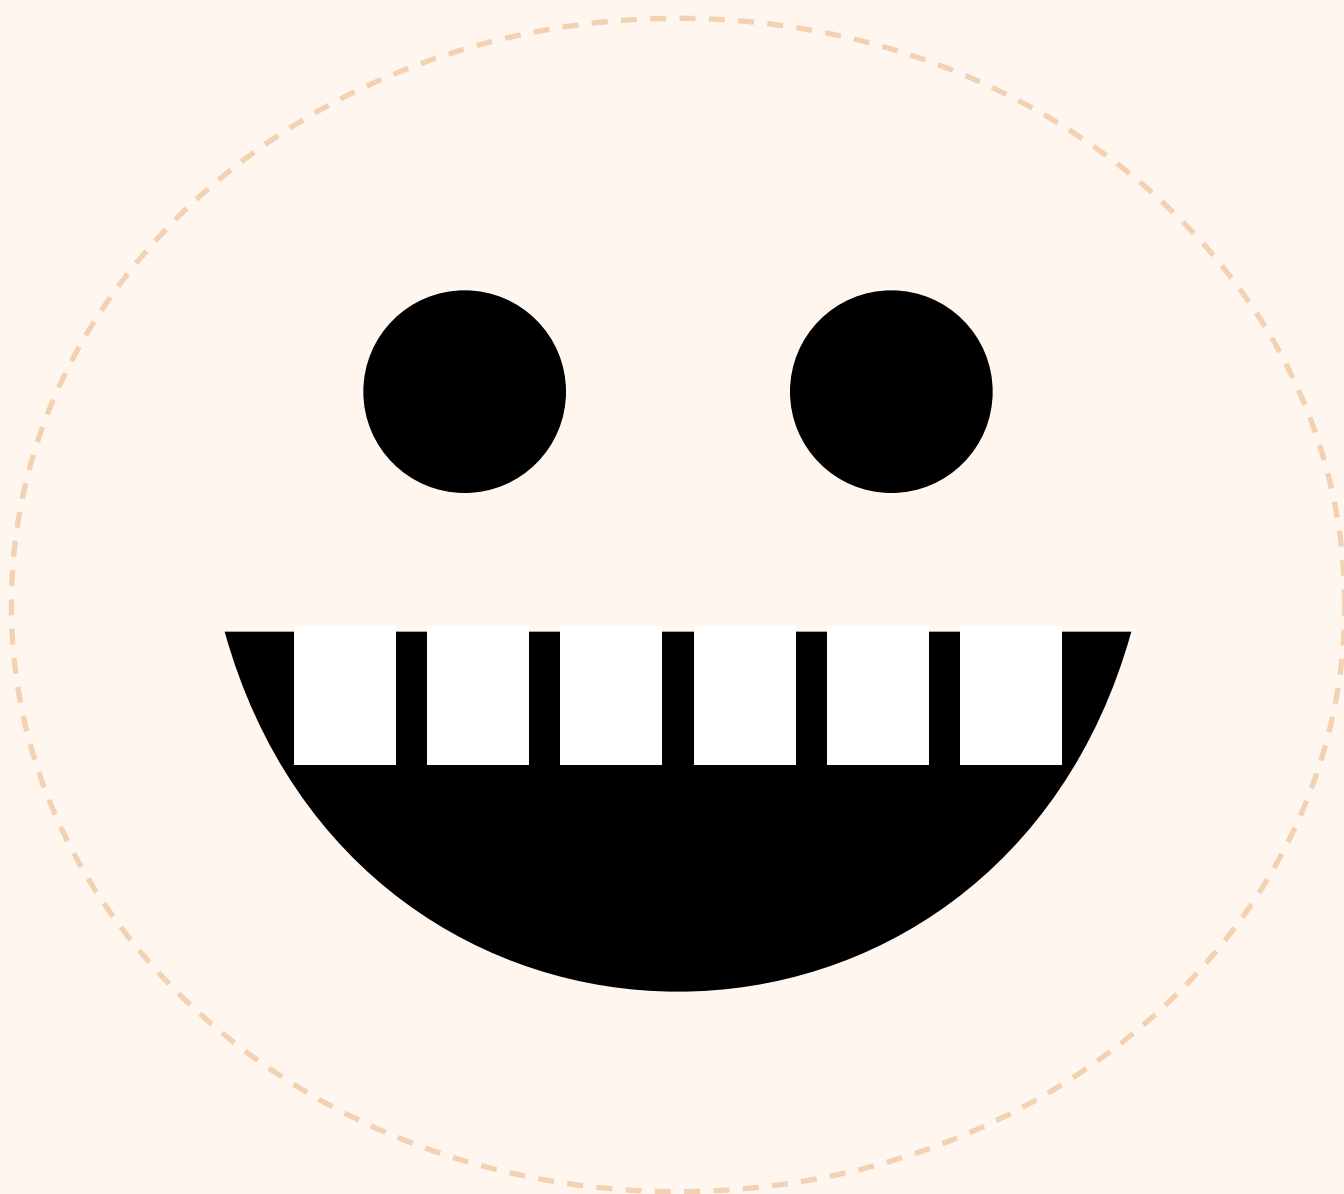

Achoo! Add a tissue held on with toothpicks for extra laughs.

Heart Eyes

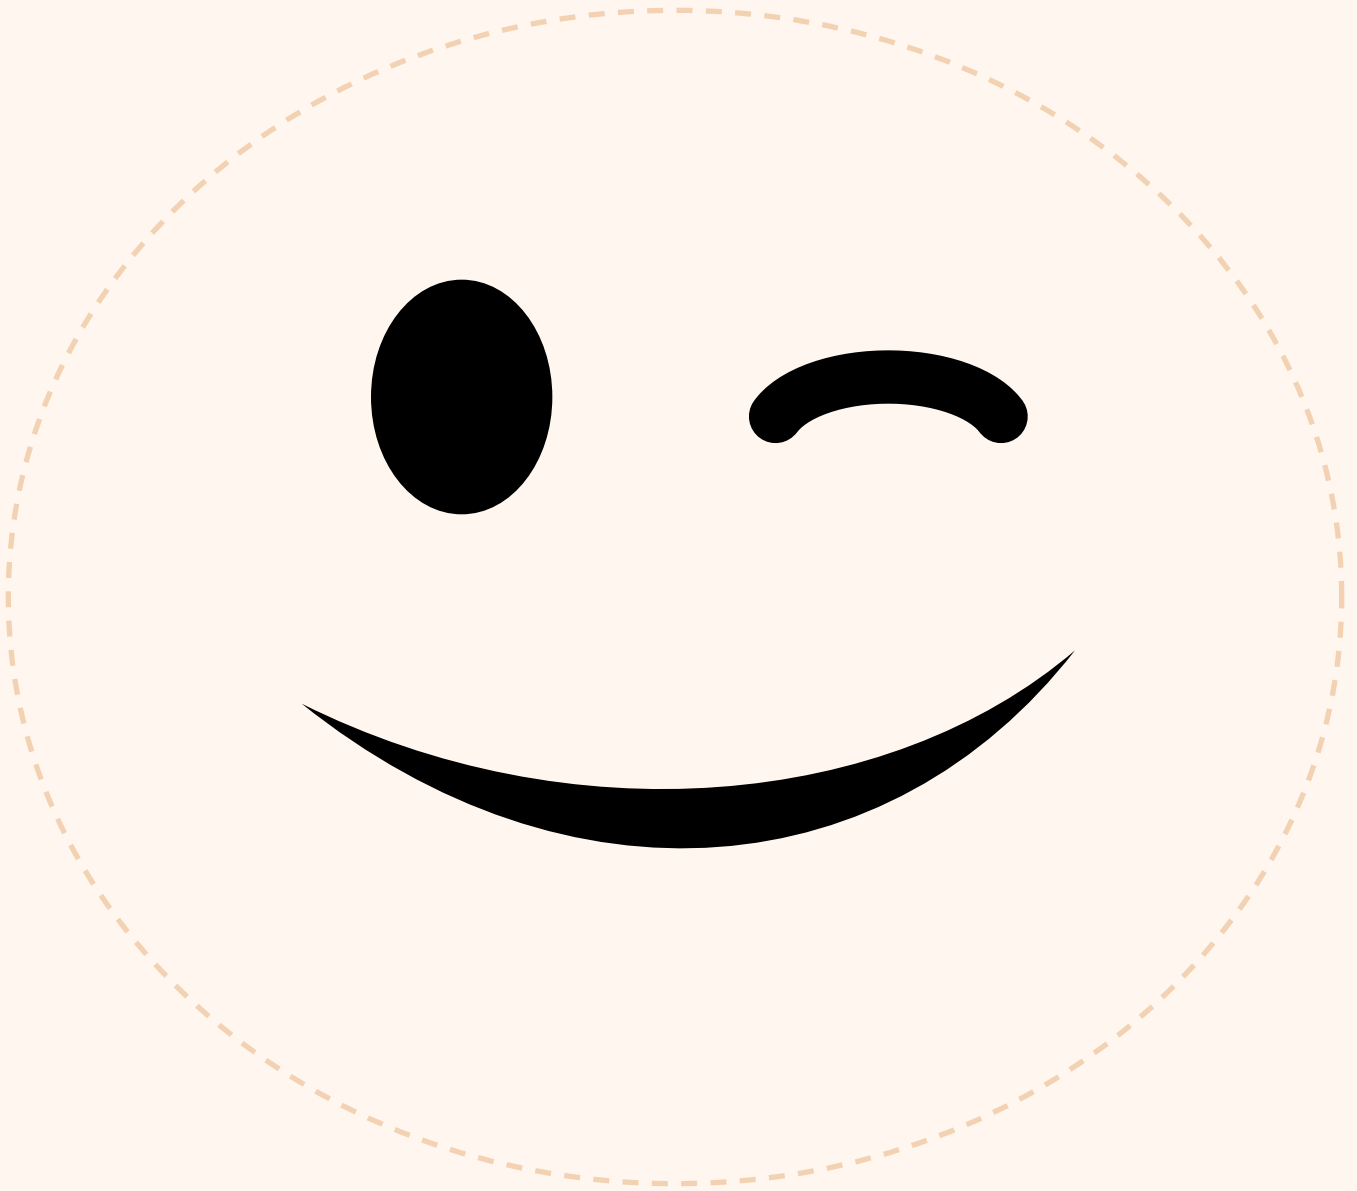

Leave the white square as a goofy tooth. Add toothpick lashes!

Say Cheese

Leave the white teeth attached to the top of the mouth as you carve.

Sly Wink

Carve the winking eye as a thin curved line or etch it into the skin.
