Make a Cardboard Reindeer

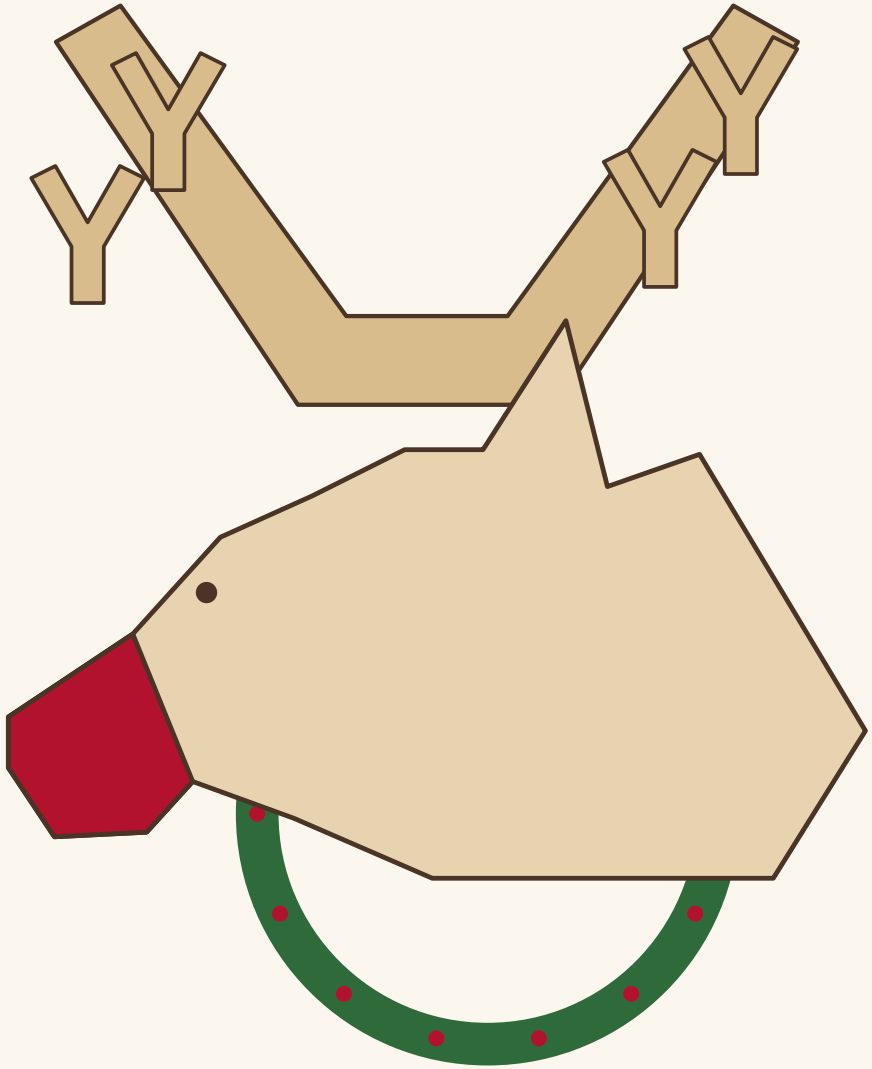

A no-cost holiday project made from shipping boxes

YOU WILL NEED

- 2 or 3 flattened cardboard boxes
- Pencil, scissors and a craft knife
- Strong glue or a glue gun
- Red paper or a large red pom pom
- Picture hanging strips, plus a wreath (optional)

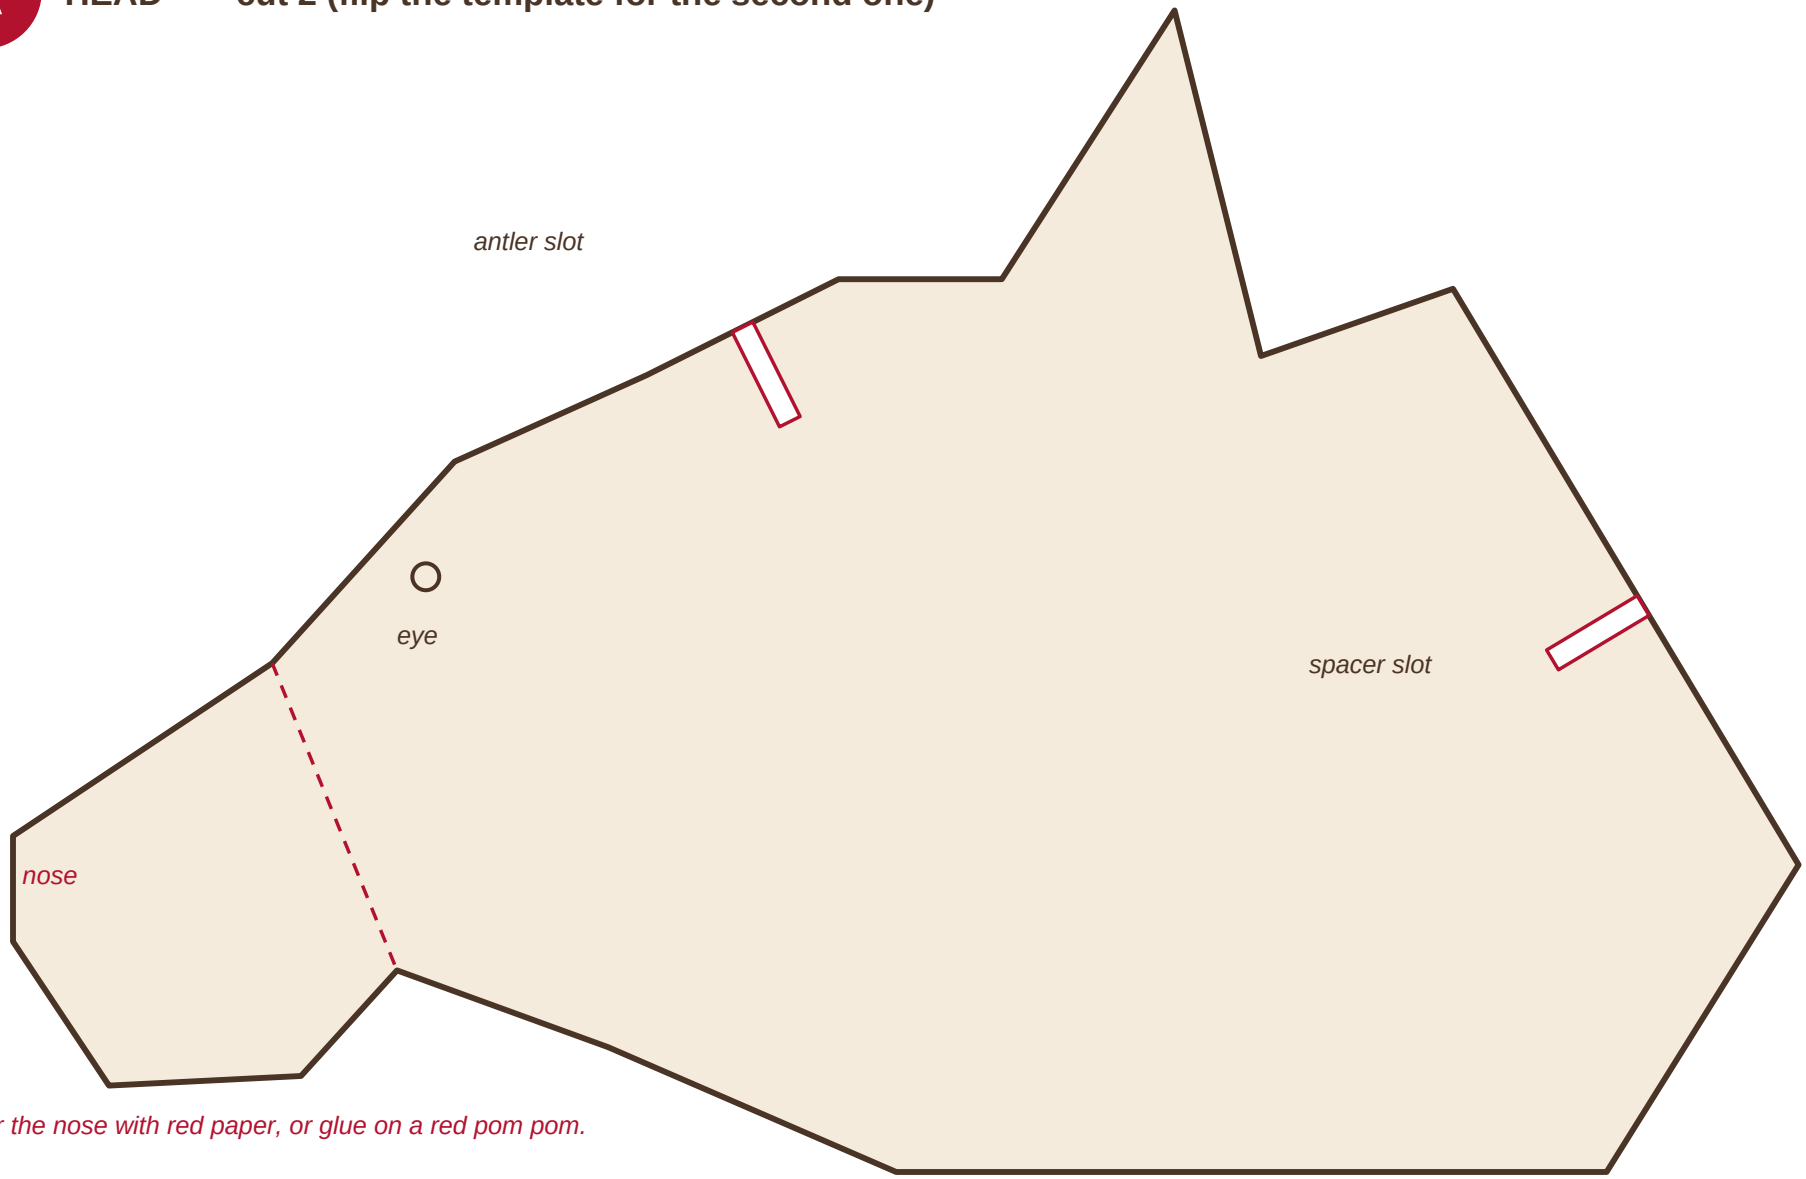

HOW TO MAKE IT

1. Print pages 2–4. Enlarge 150–200% for a bigger reindeer.
2. Trace the pieces onto cardboard and cut them out.
3. Cut out every slot so it’s as wide as your cardboard.
4. Slot the 6 tines (D) into the antler (B).
5. Slide the spacer (C) into the back slots of both heads (A).
6. Glue the heads together at the nose, then slide the antler into the forehead slots.
7. Cover the nose in red, draw the eyes and hang.

C SPACER — cut 1

Slides into the back of both heads to give your reindeer depth.

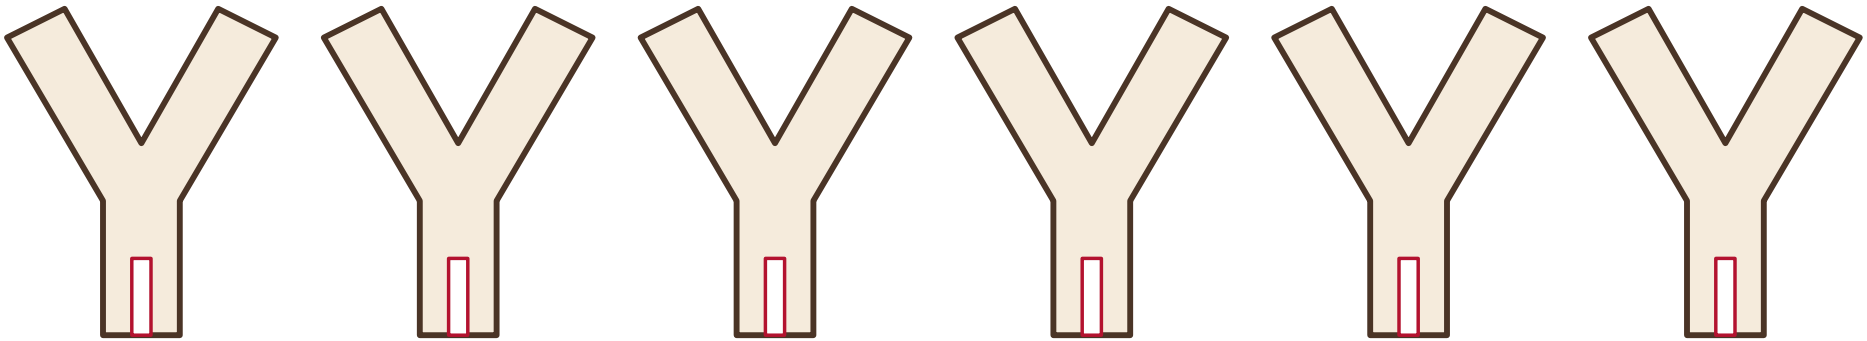

Make it your own:

Paint it white or gold

Tie a jingle bell on a ribbon collar

Hang it on a fresh wreath

D TINES — cut 6

The slot at the base of each tine fits into a notch on the antler (B).

Cut along the outline

Cut out slot, as wide as your cardboard
