Gold Bow Garland

A paper version of the brass bow garland, sized for a 30 to 36 inch range hood

WHAT YOU NEED

- Printable gold metallic cardstock, 8.5 x 11 (one sheet makes 6 bows; use two sheets for a full garland)
- About 4 feet of jute twine
- Scissors, plus a 1/8 inch hole punch or a craft knife
- Two removable hooks for hanging

HOW TO MAKE IT

1. **Print.** Print the template page onto the back of the gold cardstock, two copies for 8 to 12 bows.
2. **Cut.** Cut each bow along its outline, then punch the two small holes marked at the knot.
3. **String.** Thread the twine in one hole and out the other so it sits behind each knot. The bows slide, so you can fix the spacing on the wall.
4. **Hang.** Center 7 to 9 bows along the middle 3 feet of twine, alternating the two sizes. Swag the garland under your hood wreath on removable hooks, with the tails pointing down.

Want sparkle on both sides? Cut one bow out, trace it onto 12 x 12 glitter cardstock, and cut along your traced lines instead.

Print this page on the BACK of your gold cardstock. Cut along the outlines, then punch the two small holes at each knot.
